SUMMARY

Aspiring AI engineer and problem solver studying Computer Science (AI) at Universiti Malaya. I like understanding how things work end-to-end from the model itself to the infrastructure that runs it and I'm always looking for the next thing to build or break down.

PROJECTS

PolyFlow – AI Suspicious Activity Recognition | *PyTorch, YOLOv8, Flask, AWS* | [GitHub](#) Oct 2025 – Present

- Designed and developed a real-time AI pipeline fusing **YOLO11s-Pose** skeletal tracking, **Lucas-Kanade** optical flow, and **X3D-XS** visual context via a custom **Lightweight Temporal Transformer**.
- Achieved **video-level AUC-ROC of 0.9059** on the UCF-Crime benchmark; deployed 3 concurrent streams at **>15 FPS** on RTX 3060 with a 6-page Flask web dashboard and **15+ REST API endpoints**.
- Implemented **Deep Streaming LDA** for online model adaptation without catastrophic forgetting, enabling both binary anomaly detection and 14-class event recognition.
- Architected a cloud-native AWS deployment (**IoT Core, Kinesis, EKS, EventBridge, Aurora**) with isolated, namespaced inference pods, provisioned end-to-end via **CloudFormation**.

Portfolio Website | *Next.js, TypeScript, Tailwind CSS* | [Live Site](#) 2025

- Designed and deployed a personal portfolio site showcasing projects, skills, and experience, hosted on Cloudflare Pages.

Hungo – Food Bank Finder | *Java, Android SDK, Firebase, Google Maps API* | [GitHub](#) May 2024

- Built a location-based Android app with **Firebase Firestore (NoSQL)** for real-time data sync and **Firebase Authentication** supporting multiple concurrent user roles.

FOP Valley – Open-World RPG | *Java (Swing), Gemma 2 2B AI, Git* | [GitHub](#) Feb 2024

- Led game design and architecture for a team-built Java application; integrated a locally-run **Gemma 2 2B LLM** for intelligent NPC dialogue and dynamic world events.

EDUCATION

Universiti Malaya Kuala Lumpur, Malaysia

Bachelor of Computer Science in Artificial Intelligence | **CGPA: 3.35 / 4.00** *Expected Feb 2027*

- Coursework:** Deep Learning, Machine Learning, Data Structures & Algorithms, Database Systems, Mobile Application Development, Operating Systems
- Certifications:** AWS Certified Cloud Practitioner

LEADERSHIP & ACTIVITIES

Group Leader | Universiti Malaya 2023 – Present

- Led teams of 5+ across **Fundamentals of Programming, Data Structures, Mobile Development**, and **Machine Learning** projects; managed Git workflows and produced **technical documentation**.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, Java, SQL, HTML/CSS

AI / ML: PyTorch, Transformers, YOLO, Pose Estimation, Gemini AI, Firebase AI SDK

AI-Assisted Development: Claude Code, Antigravity, Cursor, GitHub Copilot, Human-in-the-Loop Oversight, Prompt & Context Engineering, Agentic Workflows, AI Output Validation, Prompt Engineering

Frameworks: Next.js (React), Node.js, Flask, Android SDK, Tailwind CSS

Cloud & DevOps: AWS (IoT Core, Kinesis, EKS, EventBridge, Aurora, SNS), CloudFormation, Docker, Kubernetes

Databases & Tools: Firebase Firestore (NoSQL), SQL, Git, Linux, Google Cloud Platform, n8n, Zipper
